"Great men are known by their capability to put great thought into action."

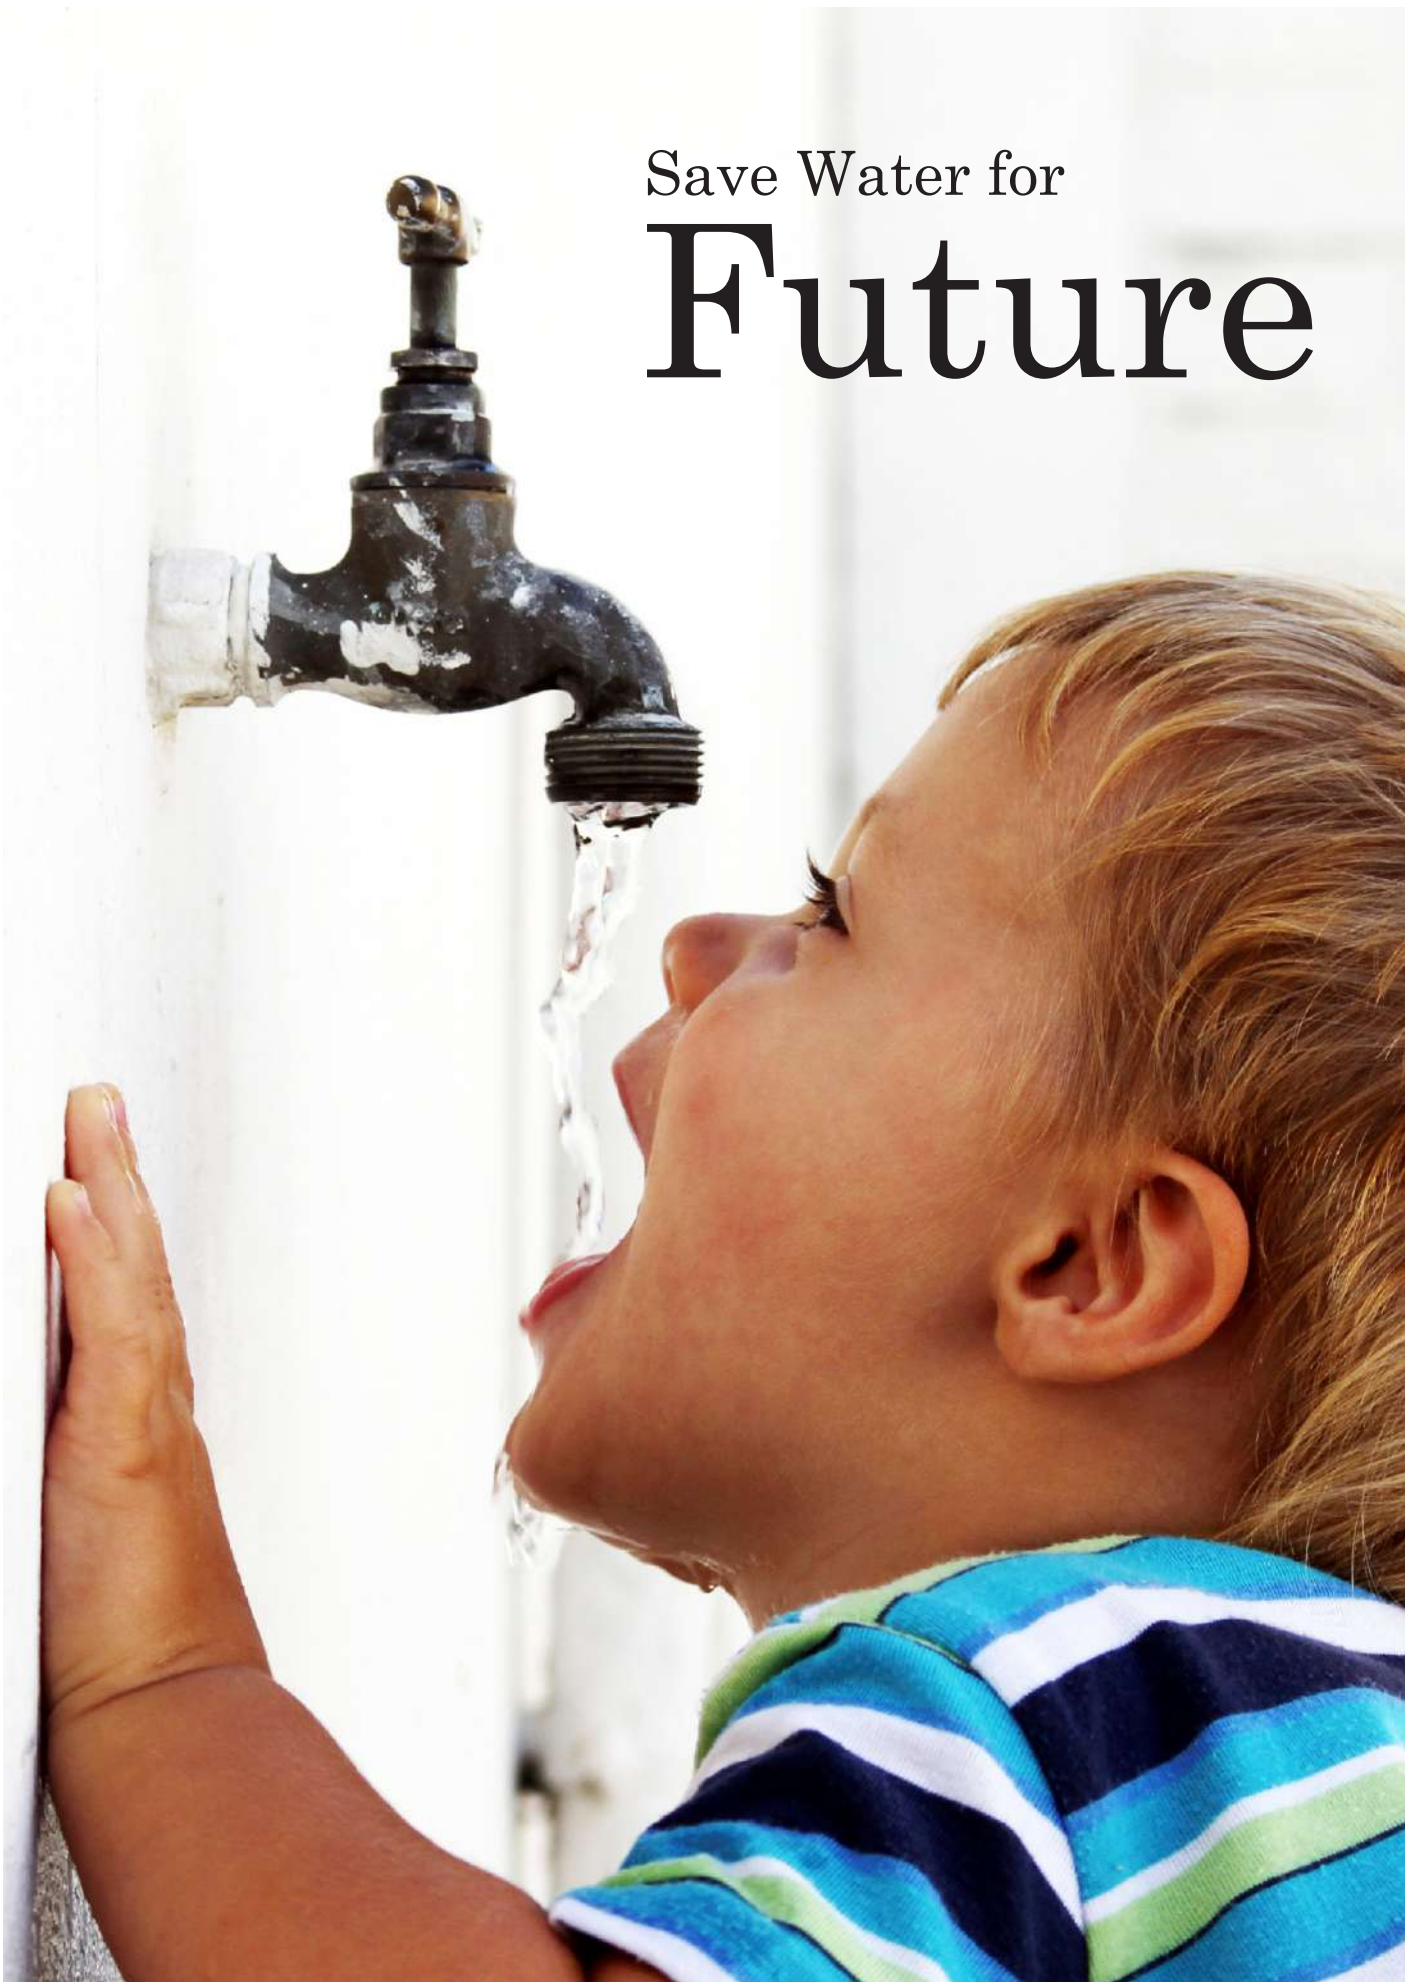

Founded in 1989 by Shri Sat Pal Gulati, Nicy is a brand that has always been associated with competence, exuberance and nobility. Battling through every obstacle that was thrown his way and realising his passion for serving others, through a company trusted and respected by all is what gave this man the impetus to turn his hard work and inspiration into a booming business that has created a unique footprint for itself in the industry today. Even after 3 decades, the company and the brand abides by the principles first introduced by our founder and our mentor, Shri Sat Pal Gulati and all the staff working in this company strives to achieve his level of excellence and commitment every waking moment of our lives through unwavering determination, perseverance and optimism.

Future

Company *profile*

1989 was a memorable year, which reminds us that our story began a long time ago. For more than 30 years in this industry, we have been committing ourself everyday to manufacture the highest quality bath fittings that can represent the excellence of Indian products around the world.

We have redesigned ourself with an aim to enhance and redefine the life style through opulence, and a vision to make and augment the upcoming culture of premium bath fitting design, a global phenomenon. Our Company has been conceptualized to deliver unparalleled service quality.

Nicy Bath fittings is headed by a group of professionals who seek out the best product for our customers. Right from the brand name, to the manufacturing, everything exudes luxury and aims to bring it for our customers. Our business model is such that the end consumer gains a seamless, expert level service without compromising on the quality or cost in mind.

Our latest collection includes contemporary as well as traditional style, that turns your bathroom into the core of your home.

What is our secret ?

Simple, the secret is in the way its made :

Each and every piece is monitored and controlled at every stage of manufacturing cycle.
